

The Scientific Authenticity of the Torah with Torah Scholar Harold Gans

This presentation combines the classical contextual and historical proofs of Divine authorship with the 20th century discovery of Torah codes. The Torah codes presented have passed peer review and have been published in professional scientific journals. They include current events like the birth dates of famous rabbis, Osama bin Laden, and 9/11. The scientific implications of the Torah codes are examined. No previous knowledge of mathematics, science, or Torah is required.

Sunday, Feb. 17

11:00 a.m.-noon

\$18 (Gold & Silver members free)

Registration Required, www.jewishroc.org

Harold Gans is a former senior cryptologic mathematician with the National Security Agency and was an employee of the U.S. Department of Defense for over 28 years. He received the prestigious Meritorious Civilian Service Award for research and was elected as a distinguished life member of the Crypto-Mathematics Institute. Currently, Gans is a Torah codes researcher and international lecturer. He has appeared on CNN, CNN International, and CBS Cable News, as well as various newspapers and news magazines including Time, Newsweek, USA Today, and The Los Angeles Times.
